2. Such a very large quantity of the preserved meat (768 lbs) put up by "Hector" had to be thrown overboard, instead of issued to the people, on account of its being rotten & stinking; (although branded, some 164 & some 165) that I recommend that meats preserved by him should not be allowed to be shipped for Government Emigrants -

10th. WATER.

Was there a water distilling apparatus on board, and by whom made? How much water did it produce daily, and at what consumption of fuel? If it had a Cooking Apparatus attached to it, state how it answered?

yes - by ~~the~~ Normandy

240 Gallons of water

3 cwt of coal

no -

Was the water produced of good and wholesome quality, and sufficient for daily use throughout the voyage?

very good & wholesome

but insufficient for daily use throughout voyage for both passengers & crew -

11th. EMPLOYMENT.

What prospect for Emigrants?

at the expiration of the 4th lay-day there were but 15% of the adults remaining in the ship - all were gone on the 6th lay-day.

12th. GENERAL REMARKS

AND SUGGESTIONS, IF ANY.

1. When the cisterns are supplied with water by the condensing engine, they should still be connected with the heat pump - otherwise, when the engine is not working there is no water for the water closets, &c.

I very highly approve of the plan of the condensing engine supplying the cisterns with water, but the plan should be subsidiary & not the sole means of filling the cisterns.
