Introduction

Scope

This RDS applies to official records in all formats including (but not limited to) those that were born digital in databases, email systems, office applications, digital cameras and video as well as physical records on film, tape and other analogue media. Any common records of Government Agencies are covered under General Disposal Schedule for State Government Agencies (GDS 30).

This RDS excludes:

- all pre-1901 records. These are permanent in accordance with a motion approved by the State Records Council on 19 February 2008
- records of permanent value already in State Records custody
- destruction of physical records badly damaged by fire, flood, mould, etc, and neglect of physical, digital records which makes them unreadable and inaccessible
- records to be transferred as part of a privatisation or sale to a non-government organisation
- records not adequately covered within the scope of this RDS

If records fall into any of the above exclusions, please contact State Records for advice.

Objectives

The purpose of this RDS is to authorise the disposal of records in accordance with the *State Records Act 1997* including:

- records of enduring evidential or informational value that cannot be destroyed and must be preserved for future reference (identified as permanent - retain as state archives) in accordance with State Records appraisal criteria and
- authorising the destruction of records not of enduring evidential or information value (identified as temporary) after they have been retained a minimum period.

Relationship to other disposal schedules

The General Disposal Schedule for State Government Agencies in South Australia (GDS 30, as amended) should be used by State Government agencies for common records documenting activities such as HR, financial management, policy and procedures.

Hardcopy source records dating from 1 January 2005 that are converted to digital format (digitised) as part of business processes can be disposed of under General Disposal Schedule 21 (GDS 21) where the conditions outlined in GDS 21 are met.

State Records issue general disposal schedules from time to time to implement disposal freezes, restricting disposal of records which might otherwise be authorised for destruction. To see the latest schedules implementing disposal freezes check State Records website <https://www.archives.sa.gov.au/managing-information/Information-management/disposal-schedules/disposal-freezes>

Interpretation

This RDS establishes minimum periods before temporary value digital and physical records can be legally destroyed and identifies records of permanent value to be transferred to State Records' custody.

Status/Disposal action definitions

- Permanent – retain as State archives
The disposal action 'Retain as State archives' is used to identify those records of enduring evidential or informational value that cannot be destroyed and must be preserved for future reference. The permanent retention of these records as State archives has been identified in accordance with the State Records' appraisal criteria. These records are required to be transferred to State Records in accordance with State Records Transfer Standard (as amended).
- Temporary – retain for *[list specific period of time]* then destroy.
The disposal action 'temporary' is used to identify records not of enduring evidential or informational value. These records are not considered to have continuing value to the agency or the State but must be retained for a minimum period. They can be destroyed after reaching this minimum period, and once any other disposal considerations have been taken into account.

Retain a record of records destroyed under this RDS

Agencies must keep their own record of all records destroyed under this RDS, noting the relevant disposal schedule entry and the authorisation for destruction. Temporary records should only be destroyed with the approval of the CE or delegate in accordance with the *Destruction of Official Records Guideline* issued by State Records of South Australia.

Compliance with the Determination

Failure to comply with this determination, or any directions in it, falls under Section 17 of the *State Records Act 1997* and may be considered by ICAC as misconduct or maladministration.
